

We must keep the cw requirement or our hf freq's will become the next cb sewer pot. All one has to do is listen to our 2 meter band in most parts of the country. These cb types are unelmerable they dont want to fit in or change. We must keep the code requirement or thousands of these types will flood our bands. Please take a listen to the 11 meter circus of filth and let that be your lesson. Please dont let our amateur bands turn into this by removing the code requirement.

Thanks  
John WR8D
